Skills

Languages: C/C++, Javascript, Python, Typescript
Libraries / Frameworks: NextJS, ReactJS, Prisma, VueJS, NodeJS, ExpressJS, TailwindCSS, SCSS, Jquery
Tools: Github, Git, GitLab, Postman, Vscode, Pycharm
Databases: NoSQL, MongoDB, MySQL, PostgreSQL

Education

SIESGST Nerul   Aug 2022 - Present

B.E in Computer Engineering   CGPA:7.5

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Data Mining and Warehouse, Software Engineering

Experience

Andheri West, Mumbai   Onsite | Nov 2024 - July 2025

Enpointe IO | SDE intern

- Developed and maintained full-stack features using Vue.js, Node.js, Express.js, SQL, and Prisma.
- Built the complete backend for a movie platform used by 5,000–10,000 daily users, ensuring performance and reliability.
- Contributed to a movie management system with modules for contract creation, bookkeeping, invoice generation, and royalty reports.
- Optimized contract workflow by 20%, implemented user management, PDF/Excel generation, email alerts, and SSE-based real-time notifications.

Nerul, Navi Mumbai   Onsite | Aug 2024 - Present

Arena SIESGST | Technical Coordinator

- Updated and redesigned the events pages to reflect current-year events and improve engagement.
- Optimization event registration pages based on user feedback, resulting in a smoother and more user-centric registration process.

Project Work

Clip Verse | Full Stack video streaming platform | [Link](#)

- Developed a YouTube-inspired platform with React, Node.js, Express, MongoDB, and Zustand for user authentication, video management, and community engagement.
- Developed features for uploading, publishing, updating, and deleting videos, along with secure JWT-based authentication.
- Added interactive functionalities, including comment liking, video likes, subscriptions, and playlist management.
- Enabled tweet creation, update, and delete functionalities for user interaction.
- Integrated Cloudinary for seamless video and thumbnail storage, enhancing media handling efficiency.

E-Commerce Application| [Link](#)

- Built a comprehensive e-commerce platform with Infinite Scrolling, enhancing user browsing and discovery
- Implemented a Shopping Cart and Wishlist Management for streamlined product handling and user convenience.
- Integrated JWT Authentication and Cookies for secure sessions and personalized user interactions.
- Developed Demo Payment Integration, Order History tracking, and User/Admin Dashboards for efficient order management and inventory control.

TravelTrail AI | AI Trip Planner Application | [Link](#)

- AI-driven trip planning app that creates personalized itineraries based on location, budget, and duration.
- Integrated Gemini API for dynamic plan generation and Google Photos API for destination images.
- Features secure user login with Google Authentication and trip management via Firebase.
- Utilized Google Console APIs for enhanced location-based services.

Awards and Certificates

- Rank of 2179 in ICPC regionals qualification round
- SDP DevOps 2024 | [Link](#)
- **Top 10 Teams** in the Err404_6.0 Hackathon | [Link](#)
- Web development Bootcamp | [Link](#)

- **7th** in CODECRAFTERS2.0 | [Link](#)
- **Top 10 Teams** in the Recursion6.0 Hackathon | [Link](#)
